## About ICMMC 2018

The Department of Mathematics, JECRC, Jaipur, India will organize the International Conference on Mathematical Modeling and Computing (ICMMC 2018). Mathematical modeling is the art of translating problems from an application area into tractable mathematical formulations whose theoretical and numerical analysis provides insight, answers, and guidance useful for originating application. The forthcoming ICMMC 2018 will highlight the new advances and research results in the fields of Computational Applied Mathematics, including, but not limited to the broad topics of Operations Research, Numerical Analysis, Computational Fluid Mechanics, Soft Computing, Cryptology & Security Analysis, Image Processing, etc. This international conference aims to bring together academicians, researchers and scientists for knowledge sharing in Mathematical Sciences, computing and Statistics areas. There will be two different parts for the conference: Invited Talks and Research Paper Presentations. The ICMMC 2018 serves as good platforms for the scientific community members to meet with each other for presenting new researches, exchanging information and discussing current issues. We believe that our future conferences will improve further the development of knowledge in these fields.
